o afiliados. No more Mr. Mean Guy! (3) Publishers, help! Aside from Batsford, Cadogan (now 'Everyman'), and Gambit, I continue to receive precious few books, and even those others I have usually had to specifically request. But when it comes to lesser openings, some of these decisions seem truly questionable. Furthermore, four authors is probably a bare minimum for such a project. Maybe it's just a coincidence, and one should keep in mind that I'm a person who has rather deeply specialized in certain lines; but too often, I found myself disagreeing with assessments of positions, some of which I feel are rather 'established' (to experts, anyway), and I also found a number of strong and already published moves missing. NCO quite properly allots little or no space to unsound and refuted lines. I think that they all deserve at least a mention, and, as a result, the next installment (#12) will be a series of mini-reviews, in which I will comment upon some of the books in a relatively uncritical fashion. From the many emails I've gotten, I now believe that the true state of affairs is this: Francis J Wellmuth was the author of The Golden Treasury of Chess and was listed as such on the original edition of the book. And the first edition of BCO had the unusual situation of Eric Schiller writing the lion's share of the first draft and then turning it over to Keene and Kasparov for a thorough review; I don't get anywhere near the sense of detail and precision from BCO that NCO gives. But readers who are familiar with the literature about their favourite opening should not be surprised if, from time to time, there are the types of omissions described above. Right off, we have the choice of authors: Burgess, Emms, Gallagher, and Nunn himself are the cream of the crop in writing about openings. But that's not quite the same as giving short shrift to lines which are speculative, but extremely popular on not just lower, but serodagoj sod airoiam a araP .maragehc songid sovon sorvil sotium ,s<sup>9</sup>Am mu ed siam jAh arof uotse omoc.9991 ,tibmaG/ssehC namyrevE ;sanig:Ap 445 :rehgallaG eoj e smmE nhøj ,ssegruB maharG ,nnuN nhøj ;sarutrebA ssehC s'nnuN ed ranimilerp lausiv mu :OCN 9991 ed lirba ed 02 arief. ašAret - nostaW nhøj ni ranimilerp lausiv mu :OCN 111( weiveR nostaW nhøj ranimilerp aicn<sup>9</sup>Arapa amU .OCN <sup>9</sup>Asorvil ed sahnesR<sup>9</sup>Á emoH .otnauqne rop sonem olep ,setnanoipeced siam sejuÁmil' ed aiedi ahnim ranodnaba idiced euq ,otnatne on ,anrom oEÁt iof etivnoc uoA lareg atsoptes A .asicerp seralucitrap sues a redneta arap otium oEÁrtrotnoce o'Án etnemlevavorp arutrebA ed sodašÁnava satsilaicepse so e sertsem so euq aires osiva ocin<sup>9</sup>Á uem e .)levjÁozar etnematrec © Á ošÁerp of aip<sup>9</sup>Ac amu ríussop rop adidneta meb aires CIWT ad serotiel sod airoiam ednary a euq ohaa uE .etnatropmi oEÁt arienan ed sodalacse meres arap sovíta sianoissiforp e sorvil ,sEÁt sotium moc arutrebA amu © Á remeID-raMkcaIB O .)oxiaba otrcsed emrofnoc .edadvre res oEAn edop ossi ,seralugeri sejuÁÁairav araP' (sanredom savitacepse sad arutíla Á jÁtse oEAn etnemlaer sam ,OCM o moc rohm ues o zef naimrifíB .)orapsak yraG acir<sup>9</sup>Áet hcrÁ od ocir<sup>9</sup>Áet o erbos air<sup>9</sup>Áiv aus me eolB repesD retupmOC od arutrebA ed oir<sup>9</sup>Átreper o revlovesed a uodija eIE .mahnaipmoca o euq sehlatad mes onsem ,sodacifitnedi sortuo snugla rev moh odís airet sam ,asioc ednary © Á oEÁN .jadan ierfnoce oEAn adniál sacil<sup>9</sup>Át saserpme saud uo saud uo amu etnemacitarp ranimile etnemacitarp eved is me rodutapmoc od oEÁšAcifírev A .ele a odanitsed © Á orvil o es ed ai@Ádi amu rotiel oa rad ednetep e seranimilerp sejuÁšserpmi me adaesab jÁres oEÁšiver ahnim ,m@Ábmat ,osac esseN .zerdax ed orvil mu me maratsoq oEAn sele euq o erbos uo/e sotrovaf sonem sorvil sues erbos sotri<sup>9</sup>Ánemoc maraivem em euq serotiel so m© Ábmat odagirB 12( zerdax ed olip<sup>9</sup>Áilbib oriedadvre mu men zerdax ed rodairtshí mu men ,etnemarac ,uos uE .ogoj ed jojoj ed sievÁn ,olpmexe ropf for a high percentage of variations, the difference will be insignificant. Each line receives an assessment, a controversy that at least guarantees some guidelines of the authors. After going through a daytime openings in which I consider myself to have some specialized experience, I began to suspect that in many or in most cases (and I am opened in the course of it), the authors had a controversy to limit your work to the huge database material in their front (as described by Nunn in their introduction) and did not verify the material with books or articles on the openings involved. Overall, the NCO is a lifeless venture that targets the largest chess community; It should serve as a complement to the increasingly specialized jobs that, as valuable as they are, sometimes pass over the heads of the common player. Let me first point out some positive points. But I feel able to give my opinion about the first and most important question: "Who is this book to" as I see, this is the book to those of my students (most of them, in fact) that Anything does not have database programs or the successful completion of this frightening task! in fact, considering how many of the nco oraries will be mid-range club players, the and ,lcm1,moc.noizam.0202-6991 © Á ,srešilbuP namyrevE' won si nagodaC ,detacidni tsu 1 sÁ ,ecneidua dednetni s'kooob eht tnaveier erom dna ,jacinhet dna icartsba ssel si evak ? sredaer 000,03 sav etamituse eno ,edilidnal a yb ylaborcp' erus n1 ,dnuora etis ssehC daer-yediv tsoem eht si CIWT .nward y/diab neeb evah of smees 'sibanoitnemu' dna 'ralugeri' neovtobisne it was mainly supplanted by detailed leaflets corresponding to only one or two of the 500 ECO codes! Thus, the opening day of an encyclopedia volume seemed past. Now I don't want to get into an unfair game of pointing things like: "Look, there are 11 columns in the Marshall Gambit and only 10 in all the 9.Ne1 Indian of the King!" In fact, I think that if you use your judgment fairly, you will find that the authors were quite considerate about such spatial allocation decisions when it came to mainstream openings. Many of us grew up in the encyclopedia of a volume, for example, Modern Chess Openings (MCO). Openings: Theory and Practice, or Batsford Chess Openings (BCO), among others. Stefan Buecker, for example, will get upset to see the complete omission of most of his favorite openings, for example, he collected many games with and wrote a whole book in 1.d4 Nf6 2.c4 c5 3.d5 Ne4 ('the Vulture'), which is at any non-refutable rate, and must have obtained at least one footnote. Let me emphasize that this seems a more serious problem than it is. The classic chess reference book, as seen in the Netflix Gambit. The standard reference work in chess openings for more than half a century, winning the epithet "the bible of the chess player". I was surprised to see, for example, that the Blackmar-Diemer Gambit (1.d4 d5 2.e4 dxe4 3.Nc3) was given only a very short footnote (8 socks lines), and that the order 1.d4 d5 2.Nc3 Nf6 3.e4 Nxe4 4.Nxe4 dxe4 was fully covered by "5.Bc4 impar". There are several other cases of semi-respectable, popular openings that are brushed out and mis-evaluated by NCO (many of the lines treated in The Big Book of Busts by Eric Schiller and I, if you want to find some examples.) Unavoidably, I encounter some problems with this book, although I don't think they will impact on the average player veryLarge to all who sent me material on this subject. In others I'm sure the market still exists for such a book, and I think Everyman/Gambit deserves credit for making the considerable resources and energy that this project clearly required. Nunn further states that there are "literally hundreds" of innovations spread throughout the book, although in the articles/publications it is written, as well as in the Introduction to the book, it continues pointing to the same three examples. The important thing (and the hard thing for someone like me to see at first) is that for a vast majority of active players, the material is deep and accurate enough to keep them busy and learning for a long time. Apparently, the second BCO was made by a team of Russians, but for me anyway, also lacks the above-mentioned accuracy. E 1.g4 (used by GM Skembris and a series of IMs) receives a 9-mode footnote stretch on a rarely used sideline, ending in equality! The real point is that such openings have loyal followers and a considerable body of practice and material published behind them; in none way this MUST have been taken into account. Besides, there is no explanation for the beginner, who would really be out of his depth here. I don't know what the failure occurred here; I'm quite confident that Cochrane is simply innocent, and two of the easiest ways to refute it are not even mentioned by NCO. But instead, we have the opening of Nunn chess (NCO), a massive and ambitious attempt to revive the encyclopedia of opening a volume. How they will like this new solution? A lot, I guess. And I should also mention the cases where one of the authors clearly made pore about loads of complex theory to indicate the best game (and very possibly took advantage of the published theory to do so). I think the databases didn't have many or proper games. All rights reserved. All .odniv-meB .odniv-meB .sadviv-meb
